## **Instructions**

- 1) Create a Python environment from your IDE, or run the script in Colab (if you're using it).
- 2) Pip install Beautiful Soup or add the BeautifulSoup package from the interpreter setting if you are using Pycharm.
- 3) Please modify the code to update the path of the following :
  - a) Stop\_words file
  - b) Positive\_words file
  - c) Negative\_words file
  - d) input \_words file
  - e) Output\_words file
- 4) Run the Python file from the terminal or a shift+enter if you are using a Notebook.
